

# ABOUT ELO WATER

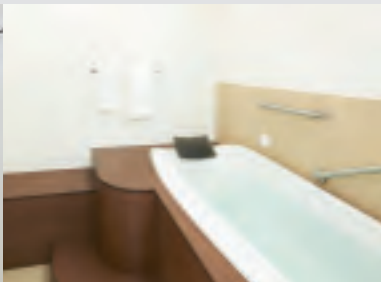

The revolutionary technology behind ELO Water allows a high level of oxygen to exist in a unique, stable and bound form that promotes quick absorption by the body, restoring its natural balance and enhancing overall well-being.

Unlike many types of oxygenated water available in the market, ELO Water is made without high pressure oxygenation methods. Pure and additive-free, ELO Water is free from chlorine, fluoride and harmful chemicals.

BREATHING WATER. LIVING WATER.

# ELO LAB BATH SESSIONS

Warmed to a soothing and comfortable temperature of between 37 to 38 degrees Celsius, each 50-minute ELO Bath Session in oxygen-rich ELO Water delivers a positive, relaxing effect on the body and enhances body tissue oxygen levels. Optimal tissue oxygenation is known to facilitate healing and is generally good for health.

Each ELO Bath Session lasts for 50 minutes and each cycle consists of 14 ELO Bath Sessions which should ideally be over 14 consecutive days, with a rest period of 10 days between cycles. There are also packages of varying durations, and the regimen may be customised for individuals. Kindly approach our friendly service staff to find out more.

For optimal results, we recommend that you start drinking ELO Drinking Water for at least a week before undergoing ELO Bath Sessions so that your body tissue can gradually adjust to the higher oxygen content.
